ONAOLAPO (LAPO) ODUNJO

+1-646-421-3781 · omodunjo@wharton.upenn.edu · linkedin.com/in/onaolapomichaelodunjo · github.com/Omodunjo11

AI-native product leader and 0-to-1 operator. Shipped production ML systems across 2B+ records and 1M+ users inside top 10 U.S. banks and major investment firms. Built and scaled AI platforms from scratch, led cross-functional teams of 10+, and guided $500M+ in capital allocation. Comfortable owning strategy, writing production Python, and staying embedded until outcomes are measurable.

CORE CAPABILITIES

0-to-1 Execution: Kinage (AI platform, $1.5M raised, 12 enterprise clients in production) · Big Nerd Ranch ($15M launch) · HAL · SignifAI

PM / Product Strategy: Amazon L6 SPM · Capital One · TD Bank · Product roadmaps · Pricing architecture · OKRs · GTM

AI / ML Systems: Agentic workflow design · LLM evaluation (precision/recall, grounding, drift) · RAG · HITL escalation · Inference monitoring · Regulated deployment

Operations / Chief of Staff: $6M P&L oversight (Wharton GA) · 100-day stabilization plans · ADKAR change management · Steering committee facilitation

Investing: DCF · LBO / IRR sensitivity · NAV analysis · GP-led continuation vehicles · Cross-border FX stress · 10 African markets

Tools: Python · SQL · FastAPI · pgvector · Snowflake · PostHog · Claude Code CLI · Cursor · Figma · Capital IQ · Bloomberg · Pitchbook

EDUCATION

The Wharton School, University of Pennsylvania — Philadelphia, PA

MBA Candidate, Finance & Strategic Management — 2024 – 2026

Trailblazer Fellowship: 50% Merit Scholarship · President, Wharton Graduate Association ($6M P&L, 1,700+ students), largest elected student role at Wharton · VP, Restructuring & Distressed Investing Club · VP, Wharton Africa Business Club

Columbia University — New York, NY

M.S. Chemical Engineering (Electrochemical Engineering) — 2021 – 2023

Full Merit Scholarship, top 21 of 5,000+ applicants · GPA: 3.8 · Co-authored AI-assisted electrochemical modeling research published in ACS journal

University of Bradford — Bradford, UK

B.Eng. Chemical & Process Engineering, Oil & Gas and Finance — 2015 – 2018

Bradford Dean Award: Full-Ride Merit Scholarship · GPA: 3.7

EXPERIENCE

Kinage — Philadelphia, PA

Founding Operator & AI Systems Architect · Pre-Seed, $1.5M Raised — 2025 – Present

Enterprise AI Workflow Platform; 62% Cost Reduction, 12 Clients (incl. Top 10 U.S. Banks & Major Investment Firms)

- **Shipped 0-to-1:** Designed and shipped probabilistic LLM classification engine replacing deterministic rule trees across intake, triage, escalation, and billing, reduced enterprise cost-to-serve 62% and improved first-pass resolution 41%. Platform is a live daily operational dependency inside SOC 2-equivalent environments for 12 clients, not a pilot.
- **Wrote production code:** Personally deployed Python modules (FastAPI, pgvector, inference monitoring, logging) into regulated environments; directed 10-person engineering team from architecture through post-launch stabilization. Code and architecture documentation on GitHub.
- **Built eval harness:** Designed evaluation framework measuring precision/recall, grounding rate, confidence calibration, drift, and latency (P50/P95); trained triage model on 3,000+ labeled events with structured fallback pathways preserving SLA and audit traceability under live load.

RAG-Based Market Intelligence Platform (0 to 1, Solo Architect)

- **Architected:** Dual-node RAG system (SignifAI/HAL) with strict source isolation between internal knowledge corpus and external regulatory signals (Federal Register, Data.gov, RSS); enforced agency-level filtering, temporal windowing, deduplication, and post-fetch relevance scoring, replaced 10+ hours of weekly manual analyst research.
- **Monetized:** Structured tiered B2B2C pricing ($99.99/mo. partner, $49/mo. consumer); modeled LTV/CAC, CAC payback, and COGS ($2.35–$4.75/user); built 45-day GTM execution plan, investor data room, and objection-handling library.

Amazon — New York, NY

Senior Product Manager, Technical; L6 (Offer Received) — Summer 2025

GenAI-Driven Retention & Revenue Optimization; $148M ARR Opportunity (1.17M+ Subscribers)

- **Seized the opportunity:** Quantified $148M ARR opportunity through cohort-level decomposition of 31-day (27.7%) and 60-day (43.2%) churn across 1.17M+ Grocery subscribers and 75K+ DAUs; designed A/B experimentation roadmap using counterfactual baselines and incrementality testing.
- **Built the model:** LLM-assisted churn propensity model combining structured telemetry and unstructured VOC; partnered with Data Science to productions risk thresholding (≥0.65) and trigger-based lifecycle interventions; developed prompt-controllability guardrails mitigating hallucination and brand-safety risks.

- **Structured prioritization:** Ranking-style framework for intervention triggers based on predicted marginal revenue contribution; modeled latency distributions (P50/P95/P99) and ML infrastructure scaling tradeoffs for high-volume platform serving 75K+ DAUs.

TD Bank New York, NY
Product Manager, Data Strategy / Enterprise Transformation Lead 2023 – 2025

Enterprise ML Deployment & Transformation; $500M+ Capital, 2B+ Records, 15 Business Units

- **Deployed 0-to-1:** Cut investigation time 29%, reconciliation cycle time 25%, and improved platform reliability 30% by deploying anomaly detection and reconciliation models across 15+ BUs and 2B+ records inside a $400B institution, models became the default compliance routing layer firmwide.
- **Led transformation:** Day-to-day lead for executive stakeholders across Finance, Legal, and Compliance; facilitated steering committee sessions; designed operating model realignment with ADKAR-style adoption milestones across distributed analyst communities.
- **Guided capital:** $500M+ in enterprise capital allocation through ROI/NPV frameworks including buy vs. build analysis; structured 100-day post-deployment stabilization plans and KPI dashboards; enforced single source-of-truth governance with version control and full metadata traceability.

Capital One New York, NY
Principal Associate, Data as a Service 2022 – 2023

- **Platform ownership:** Improved retention 15% and unlocked $80.3M in tax-credit recognition by owning the product roadmap for a $270M distributed analytics and API platform serving 200+ internal teams; defined data contracts, schema governance, inter-service reliability standards, and usage-based billing logic.
- **ML modelling:** Designed predictive churn-risk models informing pricing tiers and customer segmentation; modeled LTV/CAC and consistency vs. performance tradeoffs under concurrent load for high-throughput API infrastructure.

City Platform (City Ventures) Philadelphia, PA
Investment Professional, Growth Equity & Private Markets 2024 – 2026

- **Deal lead:** 2 closed equity investments (mid-to-high-seven-figure checks): owned underwriting, three-statement modeling with FX stress cases, IRR sensitivity, and IC presentation; negotiated valuation, board rights, preferred liquidation preferences, and anti-dilution provisions.
- **Market sizing:** Built bottom-up TAM model across 10 African markets (180M+ addressable users) quantifying digital finance penetration, mobile money adoption curves, FX exposure, and regulatory pathway risk; shaped fund-level thesis across Nigeria, Kenya, South Africa, Ghana, and Egypt.
- **Coverage:** Underwrote 60+ growth-stage fintech and infrastructure platforms; evaluated GP-led continuation vehicles; led post-close 100-day value creation plans with KPI dashboards aligned to GP reporting standards.

Big Nerd Ranch Atlanta, GA
Project Strategist 2021 – 2022

- **0-to-1 launch:** Delivered MVP for an accessibility-focused iOS platform in partnership with a Fortune 10 company; designed pricing model and commercialization plan from scratch, generated $15M in revenue within three months of launch.

Chevron Lagos, Nigeria
Process Engineer & Financial Analyst 2018 – 2020

- **Engineering + finance:** Built simulation-based optimization models improving refinery throughput 8–10%; operated within Nigerian DPR/IOC regulatory environment with direct exposure to infrastructure-scale capital allocation, IOC/JV contract economics, and long-cycle asset risk.

ADDITIONAL INFORMATION

Technical: Python · SQL · FastAPI · pgvector · Snowflake/Synapse · RAG architecture · LLM evaluation · Agentic workflow design · Drift detection · HITL escalation · A/B experimentation · Incrementality testing · PostHog · Latency modeling (P50/P95/P99) · Schema governance · CI/CD · ETL · LTV/CAC modeling · ROI/NPV frameworks · TAM modeling · Pricing architecture · ADKAR change management · Claude Code CLI · Cursor · Figma · Capital IQ · Bloomberg · Pitchbook

Africa: Nigeria (DPR/IOC regulatory, Lagos-based) · Kenya · South Africa · Ghana · Egypt · Cross-border fintech & infrastructure diligence · FX modeling · Active networks across West African diaspora

Languages: English (native) · Yoruba (native) · French (beginner)

Interests: Soccer (Manchester United) · Global travel (36 countries) · Founder, Young Africans in Diaspora · Small-group dinner hosting
