

ONAO LAPO (LAPO) ODUNJO

FDE Product Manager | Production AI Systems | Enterprise Platforms | Forward-Deployed Products

New York, NY | +1-646-421-3781 | odunjoonaolapo@gmail.com | [linkedin.com/in/onaolapomichaelodunjo](https://www.linkedin.com/in/onaolapomichaelodunjo) | lapoodunjo.com

EXPERIENCE

Kinage

Philadelphia, PA

Forward Deployed Product Manager

2025 – Present

- Built production agentic workflow embedded inside top 10 U.S. banks: nine-node architecture across ingestion, extraction, enrichment, classification, anomaly detection, state management, confidence scoring, policy gating, and human review using Claude API, OpenAI API, and n8n orchestration.
- Designed an AI escalation triage copilot for enterprise support workflows, combining context retrieval, issue classification, recommendation generation, confidence-based routing, and human-in-the-loop review to reduce time-to-resolution and improve decision consistency.
- Defined product strategy for high-trust autonomous agent systems, translating ambiguous regulated workflows into system architecture, acceptance criteria, V1/V2/V3 roadmap sequencing, and human-in-the-loop operating models; produced ~\$600K in estimated annual client savings.
- Constructed an agentic workflow controls for dynamic retrieval, clarification, re-analysis, and escalation based on confidence and risk thresholds; defined evaluation metrics across retrieval quality, routing accuracy, human acceptance, and business outcomes.
- Improved precision 22%...50% and reduced false positives 60%...15% through 300+ labeled examples, confusion matrix analysis, and confidence calibration; produced ~\$600K in estimated annual client savings.
- Designed four-tier GTM intelligence system (Signal Capture → Enrichment → Intelligence → Execution); centralized ICP scoring in Claude-powered governance layer connected to Clay, HeyReach, and HubSpot; reduced GTM stack cost ~\$215K annually.
- Hired and managed 14-person contracted team across engineering, data ops, and evaluation; defined all specs and acceptance criteria; shipped Python/FastAPI backend and Next.js frontend from 0 to production.

Amazon

New York, NY

Senior Technical Product Manager Intern, Prime Subscription

Summer 2025

- Owned product strategy for \$148M ARR Prime subscription initiative (1.17M+ MAU within \$8.4B business); shipped ML-driven targeting framework for personalization and retention in partnership with data science.
- Aligned 8 cross-functional stakeholder teams, Data Science, Engineering, Marketing, Finance, and Legal — on targeting framework scope, success metrics, and launch criteria; presented a roadmap to VP-level leadership.

TD Bank

New York, NY

Senior Product Manager, Enterprise Data Platform

2023 – 2025

- Built investment case for \$500M+ enterprise data platform; managed 13-person cross-functional team and coordinated 170+ contributors through executive alignment and delivery governance across 15 business units.
- Operationalized fraud ML across 40+ integrations; improved investigation throughput 29% and reduced deployment time 30%; resolved VP-level escalation by demonstrating proposed real-time architecture created 3× cost for <5% outcome improvement.
- Defined enterprise data product vision and OKR structure across 15 business units; established data governance framework adopted org-wide, reducing duplicate data pipeline spend and accelerating time-to-insight for analytics teams.

Capital One

New York, NY

Principal Associate, Data as a Service Platform

2022 – 2023

- Owned \$270M enterprise API platform serving 200+ internal teams; drove 15% adoption growth and \$80M+ measurable value creation through developer experience improvements, SLA uplift, and strategic deprecation of legacy endpoints.
- Led platform discovery across 12 product areas to consolidate redundant APIs and build a unified data access layer; reduced integration complexity for engineering teams by standardizing authentication and documentation.

Earlier: Big Nerd Ranch (PM), UnoTelos/IBM (PM), Santander Bank (PM), Chevron (Engineer)

2013 – 2022

LEADERSHIP & AFFILIATIONS

Africa AI Leaders Fellowship (AAILF) – Co-Founding CEO

2024 – Present

Ford Foundation and Mastercard-backed initiative building AI governance and policy capacity across 10+ African nations through fellowship cohorts, regulatory workshops, and government advisory programs.

Wharton Graduate Association – President

2024 – 2026

\$6M annual budget, 20+ teams, 1,700+ MBA students; primary liaison to Wharton administration on student experience, policy, and programming.

TECHNICAL SKILLS

AI/ML: LLM classification, prompt engineering, evaluation infrastructure, RAG, agentic workflow design, human-in-the-loop, confidence calibration, synthetic data, error taxonomy | **Tools:** Claude API, OpenAI API, n8n, Python, SQL, FastAPI, Next.js, AWS, Azure Databricks, Snowflake, HubSpot, GitHub Actions
